DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of group I, claims 1-6 in the reply filed on November 28, 2005 is acknowledged. The applicant cancels claim 7.

Priority

Acknowledgment is made of applicant's claim for foreign priority under 35
 U.S.C. 119(a)-(d). The certified copy has been received and placed of record in the file.

Drawings

3. The drawings are objected to because the figures are improperly cross hatched. All of the parts shown in section, and only those parts, must be cross-hatched. The cross-hatching patterns should be selected from those shown on page 600-114/115 of the MPEP based on the material of the part. See also 37 CFR 1.84(h)(3) and MPEP § 608.02.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet,

Art Unit: 2841

and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 5. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Asai et al., US Patent No. 6,828,510 (Asai).

Regarding claim 1, Asai, in figure 6, disclose a circuit connecting structure, for a circuit carrier, wherein the circuit carrier comprises a first patterned circuit layer and a second patterned circuit layer, the circuit connecting structure comprising: a first insulating layer (20), wherein a first via hole (32) is formed therefrom; a second

Art Unit: 2841

insulating layer (14), wherein a second via hole (32) is formed therefrom, and the second insulating layer is formed over the first insulating layer (see figure 6); a conductive pad (18), disposed between the first insulating layer and the second insulating layer, wherein two surfaces of the conductive pad are respectively connected to the first via hole and the second via hole (see figure 6); a first conductive layer (24), disposed over the first insulating layer away from a surface of the second insulating layer and in the first via hole for coupling to the conductive pad, and the first conductive layer serving to form the first patterned circuit layer; and a second conductive layer (24), disposed over the second insulating layer away from a surface of the first insulating layer and in the second via hole for coupling to the conductive pad, and the second conductive layer and in the second via hole for coupling to the conductive pad, and the second conductive layer serving to form the second patterned circuit layer (see figure 6).

Regarding claim 2, Asai, further discloses the conductive pad comprises copper (column 14, line 1-5).

Regarding claim 3, Asai, further discloses the first conductive layer comprises copper (column 14, line 59-64).

Regarding claim 4, Asai, further discloses the second conductive layer comprises copper (column 14, line 59-64).

Art Unit: 2841

Regarding claim 5, Asai, further discloses the first insulating layer comprises epoxy resin (column 14, line 4-27).

Regarding claim 6, Asai, further discloses the second insulating layer comprises epoxy resin (column 14, line 4-27).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Schmidt et al., US Patent No. 6,486,394, in figure 5, discloses a connecting structure with a conductive pad (12') disposed between the first insulating layer (25) and second insulating layer (15,35) with via holes (22', 32') connecting conductive layers on upper and lower surfaces.

Johnson, US Patent Application Publication No. 2002/0125044A1, in figure 2, discloses a conductive pad disposed between the first insulating layer (180) and the second insulating layer (190) with via holes in both the insulating layer.

Lee et al., US Patent No. 6,548,767, in figure 4, disclose a conductive pad (102-2) disposed between two insulating layers with via holes in both the insulating layers.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ishwar (I. B.) Patel whose telephone number is (571) 272 1933. The examiner can normally be reached on M-F (8:30 - 5:00).

Art Unit: 2841

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kamand Cuneo can be reached on (571) 272 1957. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
